

## DESK LAMP

### Materials:

- 1 bottle of Clase Azul Reposado 750ml
- Pine wood or any softwood
- 1 cable with plug
- 1 focus with socket
- 1 switch
- Screws

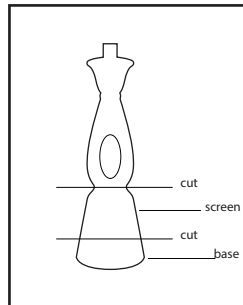

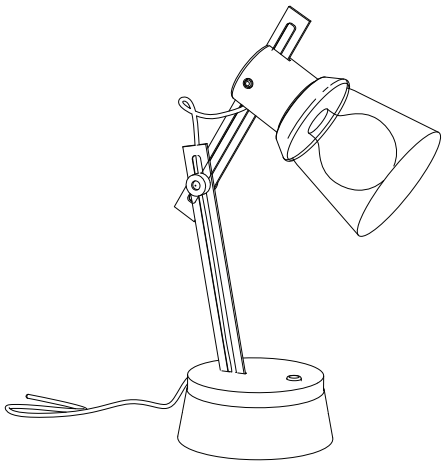

### Instructions:

This piece requires a high level of technical knowledge, so we suggest you ask for support from an expert.

The first step is to cut the structure, base and the lamp screen part "A" according to the dimensions showed in the plane. All the connections are made through the screws and assembles.

The cable should be outside, make sure that the measure of the hole on the wood screen (Part A / Part 4) is bigger than the cable.

Then cut out the bottle as shown in the drawing.

Stick with white glue the ceramic pieces and the wooden structure.  
Connect the cable to the socket of each bulb and these with the switch.

**It is important to remind that this piece required technical knowledge as well as specific tools.**
